THE SCIENCES

AN OPEN LETTER TO THE MEMBERSHIP OF THE NEW YORK ACADEMY OF SCIENCES FROM LLOYD MOTZ, PRESIDENT, 1970-71

May 4, 1970

One invasion of Cambodia last week has called forth a hurling of horror and moral revulsion throughout the world. As a citizen and as a scientist, I urge my fellow members of The New York Academy of Sciences to support the students in their actions to bring this war to an end. Scientists are in a unique position to lend the strong effort in the United States, the respect and recognition accorded us makes it essential that we speak out loud and clearly.

In my mind, there is no question that our presence in Indochina is unfounded and our actions there immoral and illegal. Continuation of the war, resumption of large-scale bombing, and the recent extension of the war into Cambodia promise many rather than fewer deaths and represent a calculated effort on the part of the President to end the war by escalating it.

During the 1968 campaign, candidate Richard Nixon made a solemn promise to end American involvement in the Vietnamese war as quickly as possible consistent with the national interest.

BIOLOGY

Bats!	Mar
Brother Rat	June
Converting the Alewife	Feb
*Endangered Animals	Feb
Evolution by Chance	Feb
Fickle Fish	Jan
Grass Under Ice	May
Hair Conditioning	Mar
Sex and the Single Boll-Weevil	Sept
Signs of Life	June
Slowing the Biological Clock	July
Sole on Ice	Jan
Stressed Pigs	Nov
Student Plant, The	May
Taking a Dive	Oct
Well-Bred Mink	Dec
*World of Roman Vishniac, The	May
Binary Vision	Dec
Bioelectrical Impedance, Academy Conference on	Feb
Black Jews of Ethiopia, The	Aug
Blood Factor in Peptic Ulcer, A	Sept
Brittle Planet, This	Nov
Brother Rat	June
By Any Other Name	Aug
